Award Date	10/29/2009		
Award Description	This program will create capacity on Staff to engage in electricity system modernization in the long-term and allow for regulatory support in the transformation of the electric grid, in coordination with other agencies in Delaware and other states in our region. It will facilitate timely consideration by the PSC of dockets, notices of inquiry, integrated resource plans, and other regulatory actions pertaining to the listed electricity-related topical areas. It will create two (2) new full-time jobs for limited term of service for one administrative electricity specialist and one entry level electricity specialist. Two full-time or a combination of full- and part-time advanced electricity specialists will be retained on a contractual basis for terms of one to three years.

Staff has found in the past that the labor pool with the necessary specialized knowledge and education for these advance positions is very limited in Delaware. Six PSC Staff and the two new electricity specialists will receive training in key emerging areas that will give regulators the information needed for effective regulatory decision-making and streamline regulatory approval in modernizing and ensuring a reliable and affordable electric system. Additional equipment such as computers, scanner, and copier will be purchased that will allow the inflow and outflow of the documents associated with the ARRA-related dockets to be handled expeditiously.

Project Information

Project Name or Project/ Program Title	State Assistance on Electricity Policies	Activity Codes (NAICS or NTEE-NPC) (up to 10)
Quarterly Activities/ Project Description	During the quarter the DOE agreed to extend our grant until 10.31.14. ARRA funds enabled us to retain an Education Specialist to lead the PSC outreach program on Revenue Decoupling, AMI and other ARRA related initiatives. The public outreach opportunities have been fewer than originally anticipated because initiatives such as: AMI, Revenue Decoupling and Demand Response have taken longer than expected. This quarter she worked on radio frequency issues associated with AMI. We were also able to retain a part-time Senior Electricity Specialist with extensive knowledge of AMI, Dynamic Pricing and Revenue Decoupling. He is currently assisting staff with a Delmarva Power & Light base rate case, the driving force of which is	Activity Code 1 Z99 - NTEE Activity Code 2 Activity Code 3 Activity Code 4 Activity Code 5 Activity Code 6 Activity Code 7 Activity Code 8 Activity Code 9 Activity Code 10

cost recovery for AMI. We were fortunate to fill, sooner than anticipated, our vacant entry level electricity specialist in June. We had four training opportunities which included the National Town Meeting on Demand Response & Smart Grid, A Public Utilities Reports Guide on line course on the Principles of Public Utilities Operations & Management. PJM came in and did an all day training seminar on 1) Base residual Auction 2) Demand Response as a participant in the different markets 3) Long term capacity market and they also included an update on the group that is studying integration of intermittent resources into the grid. In addition a teleseminar was made available. This quarter, either as a docket or in workshops, the PSC is working on the following ARRA related matters: An Electricity Revenue Decoupling Case, Advanced Metering, an Integrated Resource Plan and Dynamic Pricing and Direct Load Control, the pilot program for procurement of solar renewal energy credits and the Bloom Fuel Cell Tariff implementation. Less than 50% completed

		issues. The funds enabled us to retain one full-time job for limited term of service for an administrative electricity specialist. In June, we were fortunate to fill the entry level electricity specialist position. Also, using ARRA funds, we retained the the Bloom Fuel Cell Tariff monitor to advise the commission staff to ensure the proper implementation and associated consumer protections are in place. This quarter we brought on board an analyst tasked to analyze and evaluate the SREC procurement process. The administrative electricity specialist and the entry level electricity specialist did research and regulatory support to assist and facilitate the timely consideration of ARRA related electricity inquiries and dockets. We arrived at the "number of jobs" created by taking the total combined hours worked during the quarter for the employees and divided that number by the quarterly work hours for a full time work schedule.
